WARNING!

We must never open and add more grease to sealed (ZZ or 2RS) bearings, as this causes overheating due to friction, and the grease degrades, causing separation between the oil and the thickener present in the formula. In other words: even excess grease can lead to insufficient lubrication and bearing failure. PFI provides the optimal amount of grease calculated to maximize bearing life.

A rolling world of possibilities

PFI PRODUCES AN EXTENSIVE RANGE OF BEARINGS:

- Deep groove ball bearings
- Taper roller bearings
- Needle bearings
- Wheel bearings (PW)
- Hub units (PHU)
- Agricultural bearings
- Clutch release bearings
- Compressor bearings
- Tensioner
- Idler bearings

WHY PFI ?

- High performance
- Reliable quality
- Comprehensive range
- Stock proximity
- Technological complexity
- Committed global team
- Extensive part number information
- Focus on new product development
