Wheel Bearings

LCV | SUV | Passenger Cars
BROCHURE FOR INDIA

PFI Bearings is a leading North American manufacturer of precision bearings based in Ohio, USA, and for more than 30 years has been supporting the automotive industry delivering quality products to remanufacturers and aftermarket customers worldwide. With state-of-the-art manufacturing plants and American know-how, PFI Bearings produces high-performance bearings and wheel bearing hubs that meet the highest quality standards and OE design specifications.

At PFI Bearings, we prioritize quality in every step of our manufacturing process, using advanced technologies and selecting the finest components and materials to ensure our bearings are of the highest quality to deliver optimal performance and reliability. This dedication has earned us a reputation as a trusted partner in the global automotive aftermarket and remanufacturing industries.

Looking for a reliable wheel bearing solution? Look no further than PFI Bearings! Our extensive PFI Wheel Bearings range provides unrivaled market coverage for the most popular light commercial vehicles, SUVs and passenger car applications.

Why PFI wheel bearing hubs?

- Premium quality standards and OE design specifications.
- Optimized for enhanced performance, long service life, low noise and vibration, and reliable preload calibration.
- High performance grease and advanced sealing systems ensure maximum durability and protection against the elements.
- Strong wheel bearing range provides for the most popular American, European, and Asian automotive applications.
- Advanced sensor system, full kit versions, and quick and easy installation make it the perfect choice for any automotive application.

Choose PFI wheel bearing solutions for your bearing needs and experience the optimum level of quality, reliability, and performance.
